Statement

Cetea 5506/25

We hereby declare that the formulation of **product EGYPTENE, High Density Polyethylene, HD5502GA**, manufactured by Sidi Kerir Petrochemicals Co., and used in the production of food packaging, has been assessed in accordance with the following parts of **Title 21 of Code of Federal Regulations (CFR)**, in which the provisions of the **Food and Drug Administration (FDA)** are published. As detailed in the Cetea A078-6/25 report issued on November 7, 2025 for Sidi Kerir Petrochemicals Co., the **product EGYPTENE, High Density Polyethylene, HD5502GA** complies with the formulation criteria outlined in these provisions for use in contact with food under conditions B to H, Table 2.

- **Part 177 - Indirect food additives: polymers;**
- **Part 178 - Indirect food additives: adjuvants, production aids, and sanitizers;**
- **Part 181 – Prior-Sanctioned food ingredients;**
- **Part 182 - Substances generally recognized as safe.**

The theoretical assessment in **Cetea Report A078-6/25** is limited to the information provided by the interested party. It is not applicable to any other formulations of these products. Any modification to the **product EGYPTENE, High Density Polyethylene, HD5502GA** resin formulation will invalidate this declaration.

Note: The theoretical assessment of the formulation presented in **Cetea Report A078-6/25** was carried out based on the technical information provided by Sidi Kerir Petrochemicals Co., responsible for the conformity of the formulation and the purity of the components, which must be compatible with the intended application of the product.

This statement will be valid for three years or until the regulation(s) used as a reference in this work are updated, whichever occurs first.

Campinas, November 7th, 2025.
